- + Market leading materials, manufacturing processes, advanced technology + quality control systems
- + Authentic 100% custom made handcrafting without any pre-fabrication or shortcuts
- + Australian Business Quality Award Winner
- + Best of Houzz Service Award Winner

why choose dc+b roller shutters

Custom made in Australia, Roller Shutters not only offer protection + peace of mind, they provide a more comfortable environment. Discover for yourself why more + more people are taking advantage of this truly multi-functional product.

Unlike others in the market our Shutters are 100% custom made. There are no shortcuts, our Shutters are custom designed + manufactured specifically to fit your window, door + alcove dimensions.

our roller shutters

- + Child + pet safe with no cords
- + Excellent control of light + airflow
- + Ideal choice for thermal + sound insulation
- + UV protection for furniture, furnishings + flooring
- + Low maintenance + allergy free
- + Easy to use + clean
- + Privacy + security

- + This robust structure keeps intruders away + protects your home from storm damage + bushfires.
- + Ideal for residential or commercial use.
- + Ideal solution for shift workers, turning rooms into total darkness during the day.

bushfire ready

Sentry Roller Shutters have been credited with saving homes from burning embers when nearby properties were not so fortunate. Extensively tested by CSIRO under severe bushfire simulated conditions it was proven to be able to withstand a maximum radiant heat exposure of 40kw/m² after 60minutes. As no ignition or flaming was observed throughout the testing, the Sentry Roller Shutter has received a Bushfire Attack Level (BAL) of 40.

BAL 40 rated not FZ Flame Zone rated, please check your requirements.

energy saving

Roller Shutters have thermal insulation properties which reduce the effects of summer heat + retain the warmth during the cooler months. As such, the cost of heating + cooling your home is substantially reduced all year round making Roller Shutters environmentally friendly + an ideal investment for the future.

security + privacy

Roller Shutters present an immediate visible deterrent, helping protect your home against burglary + vandalism. Operated from inside your home they further enhance your security.

They also offer privacy during both day + night, + when fully retracted the Shutter is tucked away neatly into its headbox.

comfort

Roller Shutters are particularly effective in reducing outside noise while light + ventilation can easily be adjusted to create a pleasant, softly lit interior. In addition, they can prevent sunlight from fading furniture + floor coverings or protect window frames long term.

all the benefits

- + Australian designed. Australian made.
- + Custom made
- + Strong + durable
- + Storm + bushfire protection
- + Security + peace of mind
- + Control from inside your home
- + Stringent quality control + testing
- + Excellent light + airflow control
- + Control privacy + views
- + Protection from heat, wind + rain
- + Increased insulation + energy savings
- + Noise reduction + solar powered option
- + Easy to use + clean

design partner

Ozroll is family owned, with a real passion for developing environmentally friendly home improvement products. The company has now grown to become the largest Roller Shutter manufacturer in Australia. We are proud to partner with Ozroll for their market-leading Rollashield, the most premium Roller Shutter in Australia. Each Rollashield is engineered + custom built by trained technicians who meticulously inspect every product under strict quality control guidelines.

State of the art
technology

AR400 SERIES

These Shutters have been designed specially to suit residential homes in Australia but are also ideal with many commercial applications.

The profile can reduce private heating and cooling costs by up to 40%.*

They also have a range of features and benefits including;

- + Added security
- + Reduced greenhouse emissions
- + Protection from the elements
- + Light control + sound dampening

*Based on tests using National Housing Energy Rating Software.

SENTRY BUSHFIRE ROLLER SHUTTERS

It is common knowledge that hot or burning embers entering the home during a bushfire is a major factor in the ignition of the building itself. Sentry Roller Shutters have been credited with saving homes from burning to the ground when other surrounding properties were not so fortunate.

Sentry Roller Shutters have been extensively tested by the CSIRO under severe bushfire simulated conditions + proved to be able to withstand a maximum radiant heat exposure of 40kW/m² after 60 minutes. As no ignition or flaming was observed throughout the testing the Sentry Roller Shutter has received a Bushfire Attack Level (BAL) of 40.

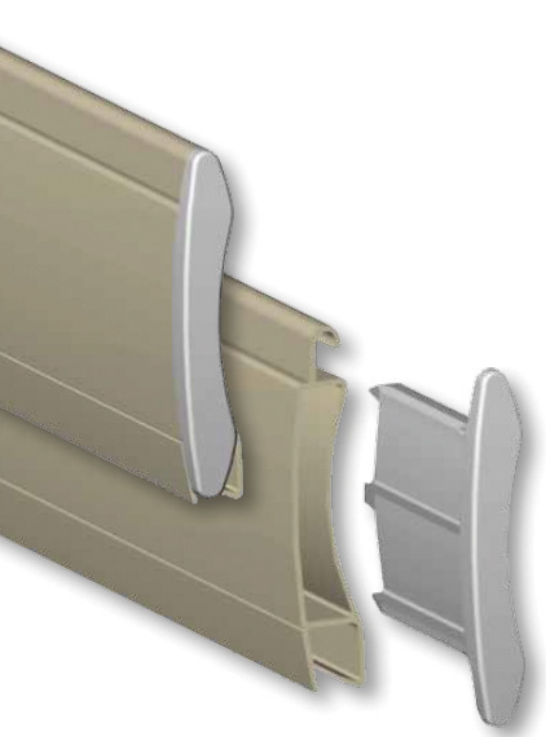

UP TO 40%
Energy savings
on heating
+ cooling

Performance Criteria	Time To Failure (min)	Position Of Failure
Formation of through gaps greater than 3mm	No Failure	-
Sustained flaming for 10 seconds on the non-fire side	No Failure	-
Flaming on the fire-exposed side at the end of the 60 mins test period	No Failure	-
Radiant heat flux 365mm from the non-fire side exceeding 15kW/m ²	No Failure	-
Mean + maximum temperature rises greater than 140K + 180K	n/a	-
Radiant heat flux 250mm from the specimen, greater than 3kW/m ² between 20 minutes + 60 minutes	No Failure	-
Mean + max temperature of internal faces exceeding 250°C + 300°C respectively between 20 mins + 60 minutes after commencement of test	n/a	-
Crib Class B	Peak Heat Flux	40 kW/m ²

Performance observed in respect of Clause 14.4 of AS153 0.8.1-2007 criteria. Report number: FSZ 1444 / Job Number: SZ3 3 03 / Date of Issue: 5th November 2010. For the purpose of building regulations in Australia, the test specimen achieved a Bushfire Attack Level (BAL) of B40. This report details methods of construction, the test conditions + the results obtained when the specific element of construction described herein was tested in accordance with AS 153 0.8.1-2007.

Sentry Extruded Slat profile

- + Strong
- + Tough
- + Durable

Sentry Roller Shutters are designed with the Sentry Extruded Blade (or slat) which is ideal for residential or commercial use when added strength + security is required.

Manufactured to the highest standards with state of the art equipment, the Sentry Blade profile is available in a 40mm curve which allows it to be used with our standard 40mm curved profile. When assembled in a Roller Shutter with Extended Guides, the BAL 40 Sentry Blade can span to a maximum of 4600mm in width.

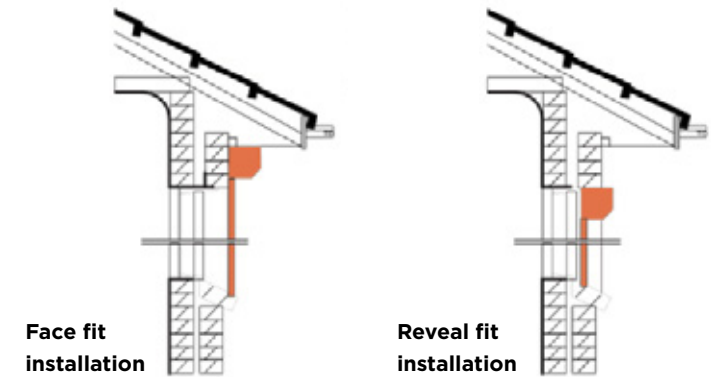

The Sentry Extruded Blade has superior strength offering increased security + performance. The overall profile appearance is clean + stylish with only a slight “V” groove line on the convex side.

Losing sleep over an odd shaped window + unsure what to do with it? Contrary to what you may think, Roller Shutters can handle it. We can manufacture to fit many sizes + various window designs like bays.

CUSTOM FIT

Our Shutters are
designed +
manufactured to
fit your exact
window + door
dimensions

automation

Our Automation range is the ultimate choice for modern day living + is now more convenient than ever. Our innovative, motorisation options can operate one or multiple Roller Shutters, at the one time.

We offer several operating options which allow you to control your Roller Shutters with the touch of a button, from inside your home. This can be automated by a battery operated system or hardwired through your home.

Our E-series technology is a low voltage battery operated system, so an electrician is not needed. Being battery operated, there is no reliance on mains power, allowing the ability to operate your Shutters in the event of a power failure. This unique system offers a simple, clean + cost-effective installation.

- + Easy to operate
- + Control one Shutter or a group at the same time
- + Clean, modern look with no cables
- + Suitable for difficult to reach windows
- + Child + pet safe

BATTERY OPERATED + RECHARGEABLE E-PORT CONTROL + OPTIONAL RF REMOTE

BATTERY OPERATED + SOLAR CHARGED E-SOLAR PRO

The ultimate in Solar Roller Shutter technology, the E-Solar Pro has been specifically designed with the environment in mind. A unique + convenient system that has the ability to collect + store energy from the sun, then use it to drive the operation of your Roller Shutters, up + down.

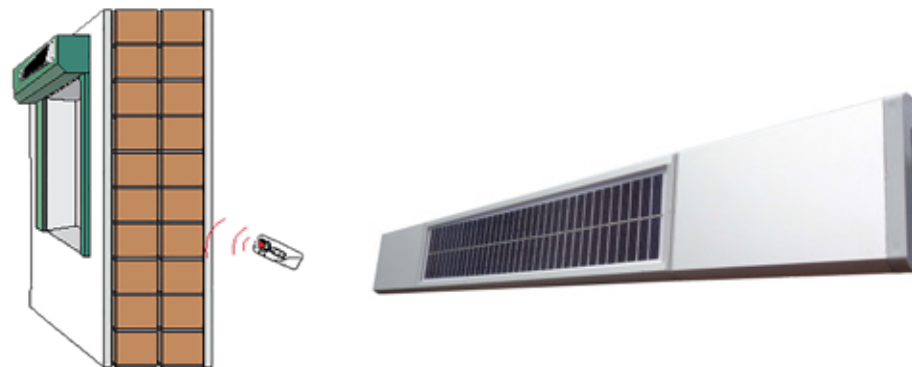

The batteries are conveniently located in the command centre of the module. Unlike other choices of Roller Shutter motorised systems, this creates a complete stand alone system with no dangerous or expensive electrical connections, and no reliance on mains power.

Installation is simplified without the need for an electrician + the system is operational using the RF Remote. All solar panels must be fixed in a position where direct sunlight can be received.

- + Environmentally friendly
- + Stand alone system
- + Simple installation
- + Save on the costs of an electrician
- + Remote control function
- + Small, efficient + lightweight panel
- + Must be in direct sunlight
